

Flexible RGB LED Strip

Attractive Features	Model No.:	BJ3-5050RGB-15-12VF		
<p><i>I only carry these in the Waterproof version, as the waterproof coating makes them much more able to withstand handling. Each segment is 4" long, and 7/16" wide, and consists of 3 miniature LED modules that each contain a red, a green, and a blue LED. These can be wired to light separately, for each individual color, (for instance, all are green), all together to make an interesting version of white, or any combination, for a wide range of color. The use of dimmers can create even more variations.</i></p>	Emitting Color:	Red	Green	Blue
